

Polarity

In Scaln it is possible to look at polarity of items. It is clear that in the Quantum Field polarity doesn't exist. There is no good or bad, or better or worse, there are only possibilities, connections. It is better to speak of conscious or unconscious undesired. Conscious aspects may be 'unwanted'. Unconscious aspects are possibly suppressed. The Chinese approach of Yin and Yang gives a good translation of what we mean.

Let us look at a scan:

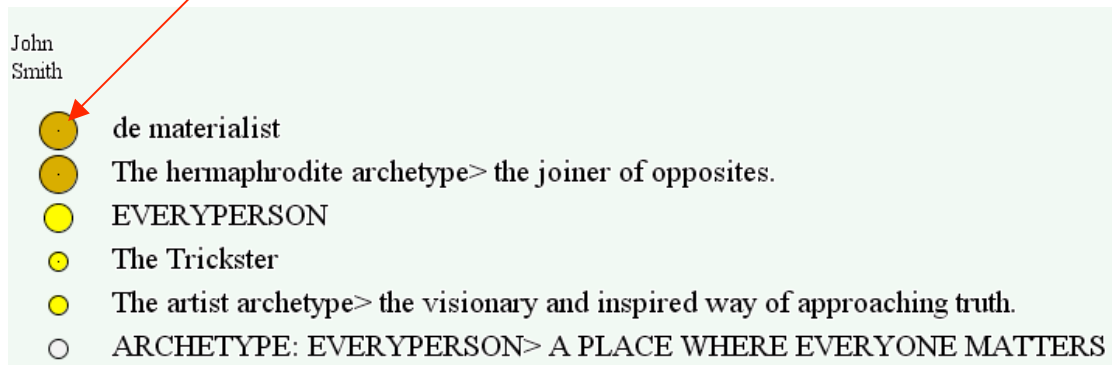

In the spider web presentation there are three resonant archetypes, from which two with a red connection and one with a green connection. The red connection is the subconscious undesired state. The green the conscious - unwanted - state.

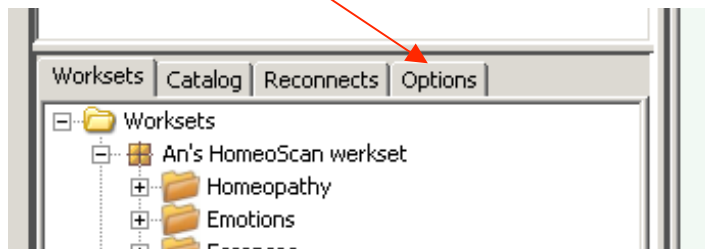

Polarity

Left clicking on '*Toggle output*' gives you the matrix presentation, in which a point in the colored circle marks the subconscious aspect. Remarkable aspect here is that the scanned person John Smit – which is a fake name – is resonant with the archetype of '*Every Person*' and the '*Hermaphrodite*'.

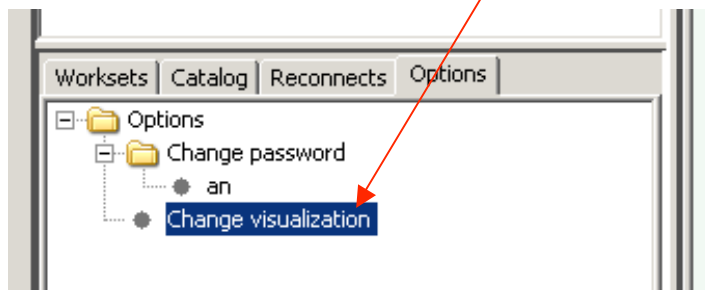

Now for people who have difficulty seeing the points in the circles, there is the possibility of adjusting the matrix presentation:

Left click on '*options*'

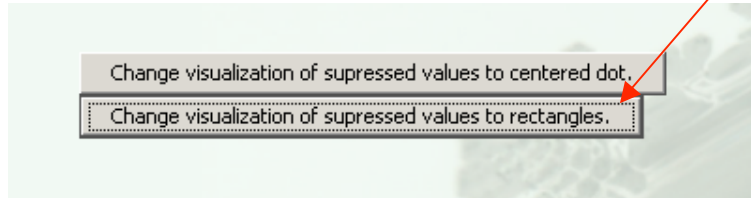

Left click on '*Change visualization*'

Polarity

and left click 'Change visualization of suppressed values to rectangles'

In the matrix presentation the visualization is changed into rectangles.
